“Instructors’ Workshop on Training Fundamentals”

Arnoma Hotel, Bangkok (Thailand)
20th September, 2014 (Saturday)
by Thomas SIM (Singapore)
Chairman – AFFA WGET
Module 3: Instructional Methods
• Introduction
• Module Objectives
• Core Instructional Methods
• Know Your Audience, Know Yourself!
• Supporting Instructional Methods
• Deciding on Methods
• The Use of Activities or Learning Tasks in Promoting Learning
• Designing & Using Learning Tasks
• **Individualized Instruction**
• **Knowing the subject well...**
• **Playing the Role of Tutor**
• **Suggestions for Administering Individualized Instructions**
• **Reflecting on this Module**
• **Module Activities**
Introduction

- In Module 2, we discussed about the importance of good planning & preparation
- however, the Lesson Plan itself will not teach the lesson effectively...
- it is the teaching methods & communication skills that translate the plan into effective learning experience for the trainees...
- the instructor can make the subject interesting & alive for the learner...!
Module Objectives

Upon completion of this Module, you should be able to:

• compare & contrast a range of instructional methods...
• select appropriate instructional methods for the specific contents you teach...
• use a range of instructional methods in your teaching role...
Core Instructional Methods

What is Instructional Methods?

• refers to any planned activity on the part of the teacher that seeks to promote identified learning...

We shall discuss and appraise the Main Instructional Methods used in typical teaching or training contexts...

It will help you to make effective decisions concerning the choice & use of Instructional Methods for your roles!...
KNOW YOUR AUDIENCE, KNOW YOURSELF

Learning Outcomes

• Review Learner’s Profile using information provided

• Preview the training programme and determine if learner can achieve the learning outcome

• Adjust training programme to match the needs and characteristics of learners

• Understand your own fears
Review Learner’s Profile using information provided

One of the cardinal principals in training is to determine what learners are like and what they want to know and **NOT** just what you want to teach!
What level are they?

How is the class divided in terms of the levels?

How much prior knowledge and experience do they have?

Will there be a language or cultural barrier during training?

What will they gain from the training?
## Pedagogy & Andragogy (TOT)

**Course details**

<table>
<thead>
<tr>

Questions?

tomsim@singnet.com.sg

Prepared & Edited by Thomas SIM – September 2014
UNDERSTAND YOUR OWN FEARS

"According to most studies, people's Number One Fear is Public Speaking!"

Many people have a "phobia" with public speaking

Pedagogy & Andragogy (TOT)
What is a phobia?

A Phobia is, "... an irrational, persistent fear of or an excessive avoidance of a specific object, some particular activity or situation."
HOW TO IDENTIFY YOUR FEARS
## POTENTIAL FEARS OF TRAINERS

<table>
<thead>
<tr>
<th>Cyberphobia: Fear of computer or working on a computer</th>
<th>Demophobia or Enochlophobia: Fear of crowds or mobs</th>
<th>Geliophobia: Fear of laughter</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Laliophobia or Glossophobia</strong> Fear of speaking in public</td>
<td><strong>Catagelophobia or Katagelophobia</strong> Fear of ridicule</td>
<td><strong>Neophobia</strong> Fear of anything new</td>
</tr>
</tbody>
</table>
### CAUSES OF PHOBIAS

Phobias are caused by some kind of deep-rooted and unresolved emotional issue from the suffers’ past, but may be triggered by, for example, continuous exposure to unhealthy stress levels. Some of the causes may include:

- A traumatic event in early life such as being ridiculed by friends or family
- An “over-protective” childhood experience where an individual was not allowed to do anything on his own
- A low self esteem, where the individual feels that what he says and do isn't important
- The expectation of failure, sometimes due to being overly criticized during childhood
### SYMPTOMS OF A PHOBIA

- breathlessness
- excessive sweating
- nausea
- dry mouth
- feeling sick
- shaking
- heart palpitations
- inability to speak or think clearly
- a fear of dying
- becoming mad or losing control
- a sensation of detachment from reality
- a full blown anxiety attack
Sustainable Human Resource Development in logistics services for ASEAN Member States

FIVE STEPS TO OVERCOME YOUR PHOBIA TO SPEAK IN PUBLIC

Pedagogy & Andragogy (TOT) (Thomas SIM)
5 Steps to Overcome Your Fear When You Speak in Public

• **Recognize Your Fear**
  You are not the only one suffering from this phobia. Understand its symptoms and its causes. By knowing what you fear and how the fear is triggered, you gain mastery over Your mind and your body.
5 Steps to Overcome Your Fear When You Speak in Public

- **Believe in Yourself**
Remember that with training and practice, you can overcome your phobia and become more confident than you feel. You have the knowledge, the wisdom and people really will want to hear what you have to say.
5 Steps to Overcome Your Fear When You Speak in Public

• *Focus on the Audience*
They have come to hear you succeed, not fail. You have something to share with them. Concentrate on what you are going to say and not how you are saying it. They are there for you. Do not disappoint them.
5 Steps to Overcome Your Fear When You Speak in Public

- **Prepare Yourself**
  The more you prepare, the more confident you will be. It is through experience and practice that you gradually learn to manage your fear.
5 Steps to Overcome Your Fear When You Speak in Public

• **Share your Fears**
  Talk about it with someone who shares the same phobia. Describe in detail how you feel. By sharing, you will gradually shed your own fear.
CREATE & MAINTAIN A CONDUCIVE LEARNING ENVIRONMENT

Learning Outcomes

• Establish rapport with learners through appropriate communication and interpersonal skills
• Use introductory activities to build a positive learning environment among learners
• Identify and reduce barriers to learning
• Manage disruptive behaviors effectively
• Manage cultural sensitivities appropriately
Questions?

tomsim@singnet.com.sg

Prepared & Edited by Thomas SIM – September 2014
Establish Rapport with Learners
Establishing Rapport is the key to a Trainer-Learner Relationship

WHAT IS RAPPORT?

WHAT ARE THE SIGNS OF “GOOD RAPPORT”?

THE KEY TO BUILDING RAPPORT!
Sustainable Human Resource Development in logistics services for ASEAN Member States

Pedagogy & Andragogy (TOT)

(Thomas SIM)
WORKING WITH...

Individuals

- Treat the individual as equals rather than as persons of lower rank
- Listen actively to the individual needs and concerns
- Guide interaction through open-ended questions
- Be empathic rather than neutral, self-centred or judgmental
- Discuss problems descriptively rather than evaluative
- Help people find individual solutions rather than give a generic solution
WORKING WITH...

Groups

- Acknowledge group members and their individual experiences
- Balance speaking with listening and asking questions
- Guide and encourage involvement without intimidation
- Check disruptive behavior or dominant interactions
- Know when and how to resume control
- Help the groups stay on the topic
- Halt side conversations
- Tolerate silence
Sustainable Human Resource Development in logistics services for ASEAN Member States

Remembers you have 7 seconds to make a good first impression

7% is influenced by the words that you say
Choose your first 12 words carefully

93% of how you are judged is based on non-verbal data

Pedagogy & Andragogy (TOT) (Thomas SIM) 34
RULE OF

12

Pedagogy & Andragogy (TOT)

(Thomas SIM)
Sustainable Human Resource Development in logistics services for ASEAN Member States

THE FIRST 12 WORDS SHOULD INCLUDE:

A WORD OF THANKS

THE OTHER PERSON’S NAME

Pedagogy & Andragogy (TOT)
THE FIRST 12 WORDS SHOULD BE TAKEN WITH:

CONFIDENCE

A PURPOSE

A LIVELY PACE
THE FIRST 12 INCHES FROM YOUR HEAD
AND
LAST 12 INCHES FROM THE FLOOR
SHOULD BE IMPECCABLE!
Questions?

tomsim@singnet.com.sg

Prepared & Edited by Thomas SIM – September 2014
MAKING YOUR INTRODUCTION

There are many ways to make your introduction as a trainer.

- Start with an unusual fact or a quote
- Use an ice-breaker
- Play a warm-up game
- Set some ground rules
- Compliment your audience
- Introduce an interesting point in your lesson
- Point to a common belief, interest or opinion
- Point out the importance of the training to the audience
Start with an unusual fact or a Quote

93% of how you are judged is based on non-verbal data

The more you chase money, the harder it is to catch it

Mike Tatum

"Don't follow where the path may lead. Go instead where there is no path...and leave a trail."

Pedagogy & Andragogy (TOT)

(Thomas SIM)
Use an ‘ice-breaker’

<table>
<thead>
<tr>
<th>B</th>
<th>O</th>
<th>D</th>
<th>M</th>
<th>A</th>
<th>S</th>
</tr>
</thead>
<tbody>
<tr>
<td>( )</td>
<td>Of</td>
<td>÷</td>
<td>x</td>
<td>+</td>
<td>-</td>
</tr>
</tbody>
</table>

Time: 10 minutes

Steps

- Give each participant a place card (shown above)
- Participants are to locate their “partner” who will have a place card with a corresponding letter or symbol < B / ( ) > < O / O f > < D / ÷ >
- Participants will be asked to introduce their “Partners”.
  - Name, company and job title
  - What are their expectations for this workshop
  - Share with the class something unique that you have managed to find out about your “Buddy”
Play a ‘warm-up’ Game

**Time:** 15 mins

**Steps:**

Have participants pick a buddy.

Each participant will teach / coach / show the other how to perform a simple task. These could be

- Making a paper boat, plane, crane etc
- Say a greeting in another language
- Play a game
- Operate a feature that is unique to your mobile phone

Ask participants for their feedback on this activity. List their responses on a flipchart. Generally, these should cover using appropriate techniques, need to practice, seeking clarifications, confirming understanding, providing support and positive feedback.
Set some Ground Rules

*Participate actively:*
You remember only 10% of what you hear but 90% of what you do! So an important aspect of experiential learning is to come forward and actively participate in the discussion and exercises.

*Ask questions:*
Ask even when you are not in doubt. Questions are not just meant for facilitators. They can be useful and usable to you. Ask a question about how a learning point can be applied to your workplace (Centering question) or how else it can be deployed in another situation (Divergent question)
Set some Ground Rules

Maintain Confidentiality:

Whatever you discuss within the program should be treated with strict confidence.

Please respect the privacy of others and do not divulge any information to anyone outside the course.
Compliment Your Audience

“Richard, you spent six years in Cambodia under the United nations’ programme to clear minefields in the rural areas. Tell us about your experience…”

“Shanti, what is the essence of “chakra” in the practice of yoga? How has it helped you in managing stress?”
Questions?

tomsim@singnet.com.sg

Prepared & Edited by Thomas SIM – September 2014
Core Instructional Methods

• “core” – in the sense that they are probably the most used approaches & provide structure for a wide variety of equally important supporting methods...!
Lecturing & Explaining

- **Explanation** – the most used I.M., also often referred to as ‘the lecture method’, ‘presentation’ or ‘chalk & talk’…
- if used well, it can facilitate effective learning by conveying key facts, concepts & principles
- it will provide a framework to guide the learners through topic & simulating interests in a subject…
Attributes of a Good Explanation

- clear statements & examples of what is being explained & its relevance to what learners need to know...
- logical organization of info with appropriate examples & analogies to illustrate concepts & principles...
- linking of key topics, concepts & principles
Attributes of a Good Explanation

- re-capping of key points at the end of each sub-topics
- a clear engaging style of presentation
- supporting well-designed & appropriate teaching & learning aids...
- opportunities for student involvement
Questions?

tomsim@singnet.com.sg

Prepared & Edited by Thomas SIM – September 2014
**Demonstration**

- is a widely used & effective method for teaching of skills at all levels...
- learners are unlikely to learn effectively from demonstration alone...
- they will need guided practice & feedback on how they are doing...
Pre-Demonstration Planning

- be clear in your mind about what you are trying to demonstrate
- analyse the skill(s) you intend to demonstrate
  - identify the crucial steps of the activity & break it down into basic operations & procedures...
  - identify what senses & what hand, body & foot movements are involved?
- remember that what is easy & comprehensible to you will be less so for most learners...
Pre-Demonstration Planning

• try to simplify without sacrificing essential components!
• organize the equipments needed & prepare any teaching aids that will help learners understand what is involved...
Carrying-out the Demonstration

• make sure everyone can see!
• arouse the interests of learners...
• describe what you intend to do & why...
• run through the complete activity (or discrete sub-activity) first, so that learners know why they are aiming to do
• reveal the main steps of the activity & identify the problem areas...
• accompany each step with a verbal description, & attempt to show the skill from the operator’s point of view...
Carrying-out the Demonstration

• adjust speed of your movements to suit learners, esp. if they are watching & copying. Watch their responses & actions - adjust your pace accordingly…

• inspire confidence in learners as you go along…this way they will be willing & keen to have a go…

• try not to be over-impress or be too absorbed in your own demo. Remember that you are trying to help learners achieve competence
Carrying-out the Demonstration

- over indulgence in your skills may rob some learners of self-confidence when they try to practise the skill...!
- on finishing the demo, check that the process has been fully understood...
- ask participants to recap the main points of the activity – this will help to identify gaps in knowledge & reinforce learning...
Questions?
tomsim@singnet.com.sg

Prepared & Edited by Thomas SIM – September 2014
Learners need to practice new skills in order to achieve positive & beneficial results... In providing learners with opportunities for individual practice, remember the followings:

- plan specific times during the session when individual practice is to be undertaken...
- arrange the environment with care...ideally such things should be done before learners arrive, but reality may dictate otherwise...

Establish a procedure to re-arrange settings when necessary...
Learner Practice & Supervision,

- ensure that when learners begin, they have an achievable objective in mind..
- try to ensure that learners are employing the correct procedure right from the start. This is more likely to occur if participants know exactly what they are to do...
- install some enthusiasm into the proceedings...
- be conscious as a whole, even when you are dealing with 1 person at a time...
Learner Practice & Supervision

- listen to what is going on around you, in case some learners are bored, confused or giving each other wrong advise...

- allocate your time fairly between individuals - adults do not expect equal time for every session, but they expect you to be fair overall...

- provide swift & accurate feedback for learners
Learner Practice & Supervision

• be encouraging & praise people for what they are going to do or trying to do
• the whole purpose of individual practice is to do it more efficiently & effectively

• when & where learners experience positive results, their achievements will encourage them to put in more effort for further success... however, until learners achieve some degree of competence, you will need to reinforce their efforts in positive ways.
Questions?

tomsim@singnet.com.sg

Prepared & Edited by Thomas SIM – September 2014
Supporting Instructional Methods

We can incorporate the followings within the Core Methods or use as the major methods for developing certain types of learning in a Session:

- group work (co-operative learning)
- questioning
- discussion
- case-studies
- role-play
Group Work (Co-operative Learning)

- it encourages communication & team working...
- it facilitates problem-solving & decision making...
- it provides active basis of learning!
- it enables the sharing of knowledge & the meeting of different viewpoints & perspectives...
- it encourages ongoing peer-assessments

However, managing group learning can be difficult & the possible benefits to learners can be offset if Group activities are poorly organized & facilitated!
Planning the Group Exercise

• **stay control of the activities**
  - it will require thorough planning & scheduling of space & time frames, thorough consideration of trainees’ skills & personalities for assignment to groups, constant follow-ups (& possible help) with each groups’ progress, controlling the time of small group activities & of presentation when class is together, and above all – PATIENCE!

  **Being in Control does NOT mean intervening all the time... You may be silent for hours & still be “in control”!**
Planning the Group Exercise

Group Exercises can be in many forms. 2 of the most common types are:

1. A large problem or case study
   - each small group takes on a small part of the problem, resolves the portion & later comes together with the other groups when the whole class is assembled
   - during the class session, each part of the problem & its solution is presented by a spokes person for each group
   - later the whole problem is then discussed by the class & resolved (*instructor must control...*)
Planning the Group Exercise

Group Exercises can be in many forms. 2 of the most common types are:

• **Same problem; Different solutions**
  - each group works on the problem & attempts to arrive at a conclusion or solution
  - later, the groups are assembled and their leaders present each group’s solution... this is usually followed by a discussion of differences & how the conclusions were reached
  - all monitored by instructor!
There is a series of activities an Instructor must attend to for a small group training exercise to be successful:

- **Plan the exercise ahead of time – How?**
  - review case problem(s) or exercises to anticipate potential difficulties & alternative solutions
  - schedule training centre space ahead of timing so things will run smoothly
  - thoroughly review the background & progress of your trainees to ensure an intelligent assignment of Group Leaders & Members in each working group. Seek interaction & participation; not hostility or dominance
Plan the exercise ahead of time – How?

- Schedule the times for separate group study & for full class participation realistically
- Allow for sufficient time for trainees to work out & debate the answers but not enough time for them to get bored
- Make notes for your instructions to class. Be sure they are complete & concise.
- Include information on what will be expected of the groups, the leaders, how long they will have, how to contact you with questions & what will be expected of them when the class reassembles
Introduce the exercises
- select the trainees as members of each group
- try, when possible, to distribute people with special skills or talents evenly throughout the groups
- avoid putting trainees with personality conflicts together in the same group (to avoid arguments, wasted time & frustration of the other members)
- try to construct groups so that the more shy trainees will feel free to offer their opinions without inhibition
• Introduce the exercises
  - give clear, concise directions using your prepared notes
  - be sure to cover:
    who belongs to which group?
    where each group can meet?
    what resources (if applicable) are available, and where?
    how long they will have to solve the problem?
    when & where class will come back together?
    what the group is to do while working together?
    what your role will be during the exercise?
    how you will contact them & how they can contact you?
    who are the leaders of each group and what are their responsibilities?
Sustainable Human Resource Development in logistics services for ASEAN Member States

- **Conducting the Exercise**
  - follow-up at start of the exercise to be sure each group has found its study location & got started
  - check the progress & interaction within each group during the exercise
  - if they are having small problems, be patient & encourage them to work things out as a group
  - lookout for participation by the quietest trainee & encourage them to participate actively...
  - remind each group of the imminent end of its individual exercises at least 5 minutes before it is due... **Stick to your planned schedules !!!**
• Conducting the Class Presentations, Summary & Review...
  - stay in control of the assembled groups & explain to them what procedures will be applied to cover the time for each group to present their solutions or viewpoints, as well as rules about interruptions or distractions...
  - make sure that schedules are met fairly
  - conduct the summary or discussion of the exercise, making sure each group’s efforts is given credit
  - maintain neutral position!
Questions?

tomsim@singnet.com.sg

Prepared & Edited by Thomas SIM – September 2014
Questioning

The effective use of questions is one of the most difficult, but effective methods for promoting learning...

Skilful use of questions can achieve the following results:

• can stimulate interests & motivation
• can use learners’ knowledge for the benefit of the group
• encourage comms. between group members
• focus thinking skills & the practice of thinking skills
Questioning

The effective use of questions is one of the most difficult, but effective methods for promoting learning...

Skillful use of questions can achieve the following results:

- encourage the development of self-expression of thought & feelings
- can be used to assess student knowledge & understandings
Key Tactics in Using Questions

- make the questions clear & brief
- pitch question at the right level for the individual or group, using language they understand
- choose the right type of question for your purpose, e.g. ‘open’ questions for exploration; ‘closed’ questions for a focused response
- ask questions in an encouraging way. Your manner will often determine the response..
- pause, to give students time to answer...
Key Tactics in Using Questions

- **answering a question involves a series of mental operations:**
  - “do I understand the question”?
  - “do I have the answer”?
  - “am I prepared to offer it”?
  - “actually speak it”?

  *You will have to learn to cope with ‘Thinking Silences’!*

- **distribute questions so that everybody has a chance to contribute...**

- **sequence questions if more than one, & always in a logical order**
Questions?

tomsim@singnet.com.sg

Prepared & Edited by Thomas SIM – September 2014
Responding to Students’ Answers

• respond to students’ answers warmly
• use non-verbal as well as verbal signals
• ensure that incorrect responses are dealt with appropriately...
• do NOT allow an individual to feel embarrassed; but don’t allow an incorrect response to pass without correction...
• some strategies include:
  - re-phrasing the question for the individual
  - providing clues to the correct answer
  - allowing other individuals to offer a response
Responding to Students’ Answers

If you cannot answer a question, be honest & offer to find the necessary information if it is pertinent to the course of study...

Note!

Do NOT GUESS or LIE!
Questions?

tomsim@singnet.com.sg

Prepared & Edited by Thomas SIM – September 2014

Pedagogy & Andragogy (TOT)

(Thomas SIM)
Sustainable Human Resource Development in logistics services for ASEAN Member States

**Discussion**

- can be a very effective method when the main objective is to encourage learners to share info & compare points of view...
- it can specifically promote learning:
  - by providing a framework for co-operative learning;
  - by encouraging the critical appraisal of different perspectives;
  - by developing a range of thinking skills
Managing a Planned Discussion

- determine the Objectives & Scope
- make it clear what are the specific purposes
- get the environment right e.g. shape of room, the seating arrangements, etc…
- prepare key questions in advance, but work situationally with the emerging flow of the discussion
- treat all viewpoints with respect, even though you may disagree strongly with a position
- manage the participation of individuals carefully…
Managing a Planned Discussion

- do not allow any individuals to monopolize the discussion, however don’t pressure people to contribute...
- keep the group focused on the topic, you may allow for some exploration of related issues
- ensure that contributions are relevant & purposeful. You will need to:
  - clarify vague or confusing remarks;
  - challenge obvious misconceptions
  - check that everyone understands the key points raised in the discussions
Managing a Planned Discussion

- encourage contributors to support their statements, especially when they show clear prejudice
- note important points so that you can refer them later on...
- call a halt to procedure at the right moment i.e. when the discussion has covered the topics sufficiently or the group stops being productive in terms of relevant inputs.
- summarize what has been discussed, identifying the critical points & issues...
Types of Disruptive Behaviour you may expect in a class:

- Frequent lateness (>15 mins)
- Side conversations
- Forgetting to bring training materials
- Refusing to answer questions or engage in lessons
- Asking questions not related to the topic
- Showing temper tantrums or making aggressive remarks
- Provoking personal conflicts between class members
- Dominating class discussions with personal opinions
- Cracking jokes with inappropriate humor such as sexual or religious connotations
Three Strategies to overcome Disruptive Behaviours

1. **Take a deep breath.**
   Breathing helps counteract the fight-or-flight syndrome and focuses attention on solving the problem **NOT** fighting the individual. It’s very important for a trainer to always keep your cool!

2. **Highlight the disruptive behavior.**
   Make it known to the class that the behavior of the individual is disruptive and not acceptable. As the trainer, you have a responsibility to create an environment conducive to learning. This responsibility should not be compromised by anyone.
Three Strategies to overcome Disruptive Behaviours

3. Asking for clarification.
People with disruptive behavior often speak in generalizations: “You’re all wrong!” “You don’t listen to people!” “You don’t see my point!”. Asking for specific examples may produce a more fruitful exchange than trying to reply to general statements.

If the individual makes a remark with sexual or religious connotation, point it out to him/her. Assume he/she has made an oversight. Give him/her an opportunity to clarify the statement.
Three Strategies to overcome Disruptive Behaviours

1. Take a deep breath – trainer must keep cool
2. Make it known politely that the behaviour of that individual is not acceptable
3. Ask for specific issues or questions that that individual might have
### Change your language

MANAGE CULTURAL SENSITIVITIES

Pedagogy & Andragogy (TOT)

(Thomas SIM)
CULTURAL SENSITIVITIES

One: We come from a diverse cultural background

Two: We practice different social norms

Three: We have different work attitudes
Managing cultural sensitivity is to focus more on our similarities and not to focus just on our differences..!
Sustainable Human Resource Development in logistics services for ASEAN Member States

PRESENTATION TECHNIQUES

Pedagogy & Andragogy (TOT)
INSTRUCTIONAL SKILLS & STRATEGIES

Learning Outcomes

- Presentation Techniques
- Instructional Tools & Techniques
- Questioning Techniques
- Coaching and Facilitation
- Rounding up
BEGIN WITH A CLEAR MESSAGE

Make clear the aim of the course. The aim of a competency-based course has to be aligned to the competency category or competency unit that is required to be achieved at the end of the course.

A course aim must be able to provide a clear, concise, and objective description of what the learners will be able to do at the end of the course.

Competency Category

Competency Unit

Course Aim

Pedagogy & Andragogy (TOT)
Presentation Techniques

“Tell’em what you are going to tell’em

Tell’em

Tell them what you’ve told them”

MAKE AN INTRODUCTION

BEGIN WITH A CLEAR MESSAGE

COMMUNICATE THE LEARNING OUTCOME

BUILD UP YOUR LESSON

ASK QUESTIONS

ADD SPICE

ROUNDING UP (CHECK RESULTS)
Like the course aim and training objectives, the learners must also understand the learning outcome. Learning outcome are usually derived from the performance criteria of each competency element.

Performance Criteria ➔ Learning Outcome
BUILD UP YOUR LESSON

Use a pyramid structure to build up the performance outcome, competency elements and competency units for your training.
ASK QUESTIONS

- Ask to confirm learning
- Ask to clarify doubts
- Ask to emphasize a learning point
- Ask questions to lead a trend of thought
- Ask about the steps in a procedure
- Ask to reinforce a learning point
ADD SPICE

A picture is worth a thousand words. Picture brings ideas to life. In today's classroom, you can use all forms of multimedia to spice up your presentation.

Use your voice!
While speech is how you use words, voice is how you create sound. To your listeners, your voice is a part of who you are and what you believe. Your voice is a bigger and more important part of your presentation than you may think. With your voice, you can mutter, whisper, or shout. You can roar, suggest, and demand. You can state, announce, assert, declare, and affirm.

Source: http://totalcommunicator.com/vol2_3/voicemessage.html

Share a story or real life experience, perform a sketch or a play, crack a joke (but be sensitive to others). All of these activities can help to spice up your training.

Pedagogy & Andragogy (TOT) (Thomas SIM)
Sustainable Human Resource Development in logistics services for ASEAN Member States

ROUNDING UP
(CHECK RESULTS)

SUMMARIZE THE KEY POINTS

ASK QUESTIONS TO CONFIRM LEARNING & UNDERSTANDING

END ON A HIGH NOTE
MAKE THE LEARNING FUN & ENJOYABLE

Pedagogy & Andragogy (TOT)
At all times remember

**BODY LANGUAGE**

Be Positive

Be Natural

Be Focused

Make the class feel relaxed

Show them that you are really glad to be there with them!

Sustainable Human Resource Development in logistics services for ASEAN Member States

INSTRUCTIONAL TOOLS & TECHNIQUES

Pedagogy & Andragogy (TOT)
The choice of a particular instructional tool or technique is often determined by the balance between two key factors:

LEARNER
What level are they?
How many are there?

RESOURCE
How much time?
How much equipment?
There are a host of tools and techniques available to the trainer. These include:

<table>
<thead>
<tr>
<th>MANAGERS &amp; SUPERVISORS</th>
<th>OPERATIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Case study</td>
<td>Lecture</td>
</tr>
<tr>
<td>Role-play</td>
<td>Rote</td>
</tr>
<tr>
<td>Presentation &amp; critique</td>
<td>Mnemonic</td>
</tr>
<tr>
<td>Simulation</td>
<td>Demonstration</td>
</tr>
<tr>
<td>Mind-map</td>
<td>Limited role-play</td>
</tr>
<tr>
<td>Mentoring &amp; Coaching</td>
<td>Games</td>
</tr>
<tr>
<td>Training video</td>
<td>Competition</td>
</tr>
<tr>
<td>Games</td>
<td>Training videos</td>
</tr>
</tbody>
</table>
Comparison of some popular learning methods

<table>
<thead>
<tr>
<th>Method/Description</th>
<th>Pros</th>
<th>Cons</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lecture</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Widely used; importance has decreased with an increased emphasis on participative methods</td>
<td>Appropriate for developing background for course, presenting material to introduce a topic, or presenting material supplementary to assignments</td>
<td>Proceed at a pace determined only by the lecturer, One-way feedback, Strains short-term memory capacity of adults, Requires a special kind of self-confidence, performance</td>
</tr>
</tbody>
</table>

Pedagogy & Andragogy (TOT) (Thomas SIM)
## Comparison of some popular learning methods

<table>
<thead>
<tr>
<th>Method/Description</th>
<th>Pros</th>
<th>Cons</th>
</tr>
</thead>
<tbody>
<tr>
<td>Discussion</td>
<td>Can draw out conflicting opinions for constructive discussion; provides a memorable context for information</td>
<td>Lengthens the time needed to get a point across, Can be difficult to stay on track, Leader/facilitator needs specific skills: must be able to manage a group, including redirecting discussion monopolised by a single topic or person</td>
</tr>
</tbody>
</table>

An excellent way to cover essential points and allow interaction with individuals in a group; incorporating discussion into lecture allows for an increase in maximum length of time recommended to maintain effectiveness and listening.
### Comparison of some popular learning methods

<table>
<thead>
<tr>
<th>Method/Description</th>
<th>Pros</th>
<th>Cons</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Case studies, role play</strong></td>
<td>Allow for participation</td>
<td>Higher degree of risk than non-participatory methods</td>
</tr>
<tr>
<td>Case study – A short and concise</td>
<td>Enable participants to learn general principles through interaction</td>
<td>(unpredictable)</td>
</tr>
<tr>
<td>case is written to prompt</td>
<td>and a simulated &quot;real life&quot; situation</td>
<td>Require lengthy preparation</td>
</tr>
<tr>
<td>participants to share prior</td>
<td>Help bridge theory and practice gaps</td>
<td>Require careful facilitation to benefit maximally</td>
</tr>
<tr>
<td>experiences and discuss various</td>
<td>Practice in a learning setting can instill confidence in trainees</td>
<td>Demand time for processing and debriefing following the exercise</td>
</tr>
<tr>
<td>perspectives to an issue</td>
<td>in preparation for the &quot;real life&quot; experiences</td>
<td>Clashes of philosophy and style among facilitators may result in</td>
</tr>
<tr>
<td>Role play – Supervisors will be</td>
<td>All group members can be involved</td>
<td>difficult situations</td>
</tr>
<tr>
<td>given roles as “managers” of the</td>
<td></td>
<td></td>
</tr>
<tr>
<td>department. This is to provide</td>
<td></td>
<td></td>
</tr>
<tr>
<td>them a wider perspective to the</td>
<td></td>
<td></td>
</tr>
<tr>
<td>issue and allow them to balance</td>
<td></td>
<td></td>
</tr>
<tr>
<td>the group demands</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Comparison of some popular learning methods

<table>
<thead>
<tr>
<th>Method/Description</th>
<th>Pros</th>
<th>Cons</th>
</tr>
</thead>
<tbody>
<tr>
<td>Games &amp; competitions</td>
<td>Fun and engaging</td>
<td>While it is fun, it may not suit all levels of learners particularly for senior management or executives</td>
</tr>
<tr>
<td></td>
<td>Requires little preparation</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Relatively easy to conduct</td>
<td>May not be possible for some learning content</td>
</tr>
<tr>
<td></td>
<td>Free format</td>
<td>Not suitable for learners with special needs</td>
</tr>
<tr>
<td></td>
<td>Encourages teamwork and adds peer pressure to learning</td>
<td>Supervision of teams may be required if the game or competition is held out-doors</td>
</tr>
<tr>
<td></td>
<td>Maximum participant from all</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Promote greater retention</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Encourage creative thinking and sharing of ideas</td>
<td></td>
</tr>
</tbody>
</table>

Games – Learners get actively involved in games. The fun of an activity takes out the chore of learning and games are known to reinforce long term retention of the lesson learnt.

Competition - This method is a highly effective way to generative innovation and creative ideas.
## Choice of Training Venues

<table>
<thead>
<tr>
<th>Training Location</th>
<th>Pros</th>
<th>Cons</th>
</tr>
</thead>
<tbody>
<tr>
<td>CLASSROOM</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ON-SITE</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Reflecting in this Module

• this Module has provided you with the range of instructional methodologies an instructor like yourself can adopt in conducting your training...

• the effectiveness of the instructor’s delivery & communication skills can make the subject more interesting, alive & engaging to the participants...!
